

# 2023 ERIAFF ANNUAL CONFERENCE

## Green and Climate Transition Plans in agriculture and in agroforestry systems

### ERIAFF Working Group session – Food System

How regional expertise and needs could influence to the future of sustainable food systems in Europe

Conference Venue: NOI Techpark, room seminar Nr.2 (-1 floor of the main building)

**MONDAY, 22/05/2023, 16:00 – 18:00**

Central European Time (CET)

**Concept:** The Green New Deal and Farm to Fork strategy put precision agriculture and smart farming among the main instruments for a more sustainable practice. The EU Common Agriculture Policy provides several opportunities (eg. 'eco-schemes', Innovation through EIP AGRI Operational Groups, different kind of Investments, etc.). Besides the many potential benefits, precision agriculture and smart farming bring also the problem of data management, data interoperability and machine interoperability.

**Objective:** The session is aiming at exchanging info among Regions about:

- existing precision agriculture/smart farming regional initiatives;
- actual technologies/sectoral needs where precision farming practices are supported/deployed;
- existing approaches or initiatives to solve the issue of data management and interoperability;
- EU funding programmes of possible interest for the promotion of interregional projects.

Timetable	Sessions
16:00 – 16:15	<b>Welcome</b>
16:15 – 16:45	<b>Introduction to workshop: Regions as changemakers for the food system transformation in Europe</b> Wouter Spek, Director, EuroBioForum Foundation, T.I.B development
16:45 – 17:45	<b>Workshops:</b> Finger food & drinks served during workshop
17:45	Feedback from workshops, discussion & conclusion
